

# SEONYOUNG KIM

seonyoungkim55@gmail.com  
[seonyoungkims.github.io](https://seonyoungkims.github.io)

## EDUCATION

---

**Korea Advanced Institute of Science and Technology (KAIST)** Sep. 2019 - Feb. 2022  
M.S. in Computer Science  
• Thesis: Generating small anomaly detection models through distillation of long term dependency.

**Hongik University** Mar. 2015 - Aug. 2019  
B.S.E. in Computer Engineering  
• GPA: 4.24/4.50 (Ranked 3rd of 173 students)

## RESEARCH BACKGROUND

---

**SoC Architecture Team | Samsung Research** Aug. 2022 - Present  
*AI Researcher*  
• On-Device AI  
• Model Compression and Optimization  
• Hardware-Aware Algorithm Development  
• Neural Processing Unit (NPU) Model Validation and AI Frameworks

**Database Lab | KAIST** Sep. 2019 - Feb. 2022  
*Graduate Research Assistance*  
Advisor: Professor Myoungho Kim  
• Knowledge Distillation  
• Time-series Anomaly Detection

**Research Lab for Distributed Intelligence and Autonomy | Hongik University** Nov. 2018 - Aug. 2019  
*Undergraduate Research Assistant*  
Advisor: Professor Young Yoon  
• Data Analysis  
• Distributed system

## PUBLICATIONS

---

### In Progress

- **Seonyoung Kim\***, Joeun Kim\*, Meejeong Park, Sangjeong Lee, Hanjoo Cho, Hayoung Yoon, Heonjae Ha. "Bespoke LUT: Non-Linear Approximation for Integer-only Transformer Inference on NPUs."

### Under Review

- Youngcheon Yoo, **Seonyoung Kim**, Minseop Choi, Banseok Lee, Dongkyu Kim, Youngmin Kim. "RaBiT: Residual-Aware Binarization Training for Accurate and Efficient LLMs." *Under review*

### Thesis

- **Seonyoung Kim**, Myoungho Kim. *Master's thesis*, School of Computing, KAIST. "Generating small anomaly detection models through distillation of long term dependency.", 2022.

### Published

- **Seonyoung Kim**, Myoungho Kim. "Knowledge distillation for anomaly detection in multivariate time series data." *Oral Presentation at Korea Computer Congress*, 2021.

## PATENT

---

- Youngchun Yoo, **Seonyoung Kim**, Minsub Choi, Banseok Lee, Dongkyu Kim, Youngmin Kim, Hyochan Jeong, and Changdong Kim. “Residual-Aware Binarization Training Method.” Patent Pending (KR Patent 10-2025-0133039), 2025.

## PROJECTS

---

1. **Efficient AI Deployment on NPUs | Samsung Research** Aug. 2022 – Present
  - Developing hardware-aware model compression techniques for LLMs, focusing on ultra low-bit quantization and ongoing publications.
2. **Edge Computing–Based Anomaly Detection in Memory Semiconductor Processes | KAIST** Sep. 2020 – Sep. 2021
  - Developed an autoencoder–LSTM model for life prediction of memory semiconductors.
3. **Chemical Mechanical Planarization (CMP) Wafer Defect Detection Project | KAIST** Dec. 2019 – Jun. 2020
  - Developed wafer defect detection using vision models on CMP wafer surface images.
4. **Neouly Security Project | Hongik University** Dec. 2018 – Jun. 2019
  - Developed a malware detection system using DNN, achieving 97.8% accuracy.
5. **AI-based Restaurant Recommendation System | Hongik University** Jan. 2018 – Nov. 2018
  - Built a restaurant recommendation system using Bi-LSTM with Word2Vec.

## TALKS AND PRESENTATIONS

---

- Internal Seminar (Journal Club) | Samsung Research** Feb. 2023 - Present
- Presented 8 papers on model compression and LLMs as part of a rotating paper review seminar.
- Graduate Seminar | KAIST** Jan. 2019 – May. 2021
- Presented 6 talks on recent research papers, advanced methods, and my own thesis work.

## HONORS AND SCHOLARSHIP

---

- Outstanding Teaching Assistant Award | KAIST** Jun. 2020
- Recognized as an Outstanding Teaching Assistant based on top-tier student evaluations.
- The Hongik scholarship | Hongik University** Aug. 2015 - Sep. 2018
- Awarded \$15,900 in total, covering approximately four semesters.
- Korea Open Source Software Developers Hackathon | Korea IT Business Promotion Association** Oct. 2016
- Contributed to the Linux perf open-source project and awarded 2nd place.

## TEACHING ASSISTANT

---

- Database System, Graduate Course | KAIST** Mar. 2021 – Jun. 2021
- System Programming, Undergraduate Course | KAIST** Sep. 2020 – Dec. 2020
- Data Structure, Undergraduate Course | KAIST** Mar. 2020 - Jun. 2020

## ACTIVITIES

---

- Vice President, Graduate Student Association | School of Computing, KAIST** Mar. 2020 – Feb. 2021
